**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** General enquiry about who's doing the Environmental Assessment. Concern regarding the pending court action against BL&A (Brett Lane and Associates) and questions about which of the Environmental Studies he was involved in.

- ⇒ Addressed by the Team. Noting that the developer has confidence on the studies performed by BL&A and that they must be approved and signed off by the Environmental Authorities anyway, for everyone's reassurance.

Follow up question regarding the time of when the Flora Surveys were performed and if there could be any irregularities on that subject.

- ⇒ Addressed by the Team, mentioning that Flora Surveys need to be performed in a certain time of the year for them to comply with the Planning Permit, so there can't be any irregularities on that subject.

---

**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** Enquiry regarding if the Wind Farm, once completed, could be extended.

- ⇒ Addressed by the Team, specially from the Development Team, mentioning that this is not our intention, this is the project and it's not part of a bigger project or just a stage from a bigger development. But on that subject, nothing stops another developer to come and try to develop a project close by, but not from our side.

<b>Action items</b>	<b>Person responsible</b>	<b>Deadline</b>
✓ Consult with Moyne Shire Council regarding potential extensions of already constructed or permitted wind farms		

---

**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** Enquiry regarding information on the banners and the numbers of potential houses that could be powered by the wind farm's output.

- ⇒ Addressed by the Team, mentioning that these are theoretical numbers to give information to the public regarding the size of the project, and that they use average house consumption as reference. The Team will review the numbers and work on more informative material for the Community.

<b>Action items</b>	<b>Person responsible</b>	<b>Deadline</b>
✓ Review numbers and update informative material, also work on more informative material for following newsletters.	Enerfin	

---

**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** Regarding the Power Transmission Lines, interest on how they will look once constructed and the route that they will take from the Substation on site into Koroit Substation. Concerns related to the ones that were built from Macarthur Wind Farm

- ⇒ Addressed by the Team, using the maps and available material (including reference pictures provided by Powercor) to give an idea on how the new and refurbished lines will look.

**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** Regarding fire risk and the transmission lines, will there be a clearance under the running lines to make sure there are minimal bushfire risks. In previous times, Powercor lines have been a fire risk. Interest on lowering the fire risks at a minimum.

- ⇒ Addressed by the Team, making notice that the design is the standard by Powercor and follows all their design and clearance guidelines and that the design of the route is being performed to avoid trees (and if trees are in proximity, what lopping and arborist work would be required) and minimize impact and fire risks.

**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** Simon Cuzens (Woolsthorpe CFA Captain) mentioned he wasn't consulted properly regarding the Fire Management Plan. Someone said he was going to contact him in a couple days, on a related previous meeting, and didn't.

- ⇒ Addressed by the Team, the consulting was done most with the CFA regional office in Geelong, with a phone call to inform the Woolsthorpe CFA. After which the plans had been submitted and there hasn't been more consultation and information produced. This will be reopened when just prior to construction starting onsite. Also, the fire management plans and more information are available on the website for reference and potential consultation by all community members.

[Post-note: Simon provided comment to the plan over the phone to SGRE and then follow up information was going to a different email address not belonging to Simon but another Simon in the Hawkesdale CFA. This has been rectified and any further correspondence will go to his personal email]

**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** Where is the Team going to be located in case they want to be reached by the Woolsthorpe Community.

- ⇒ Addressed by the Team, at the moment there's no local representation, once in construction they can easily reach out people from the Team at site (Bruce Payne/Andres Araya – Enerfin, Jason Quinn – SGRE – they will all be site based). Also, all the other communication channels are always available (phone, website and email) for community questions or enquiries.

**Agenda item:** Questions from Community Members

**Presenter:**

- ✓ Discussion: Will there be an Operations and Maintenance (O&M) Team inspecting the Wind Farm periodically? Will this include inspecting the Powercor Power Lines.

- ⇒ Addressed by the Team, there's an Operations and Maintenance Plan (O&M), which states the regularity of the inspections, but noting that these relate to the Wind Turbines and assets on the Wind Farm, and Powercor Lines fall under their own Operations and Maintenance Plan of which we have no information.
- ⇒ SGRE are responsible for 25 years for O&M, they will get back with an answer regarding how regular there will be people servicing or checking the turbines

**Action items**

**Person responsible**

**Deadline**

- ✓ Information about the O&M Plan and schedule of inspections on the Wind Farm upon completion of the project.

Siemens Gamesa

---

**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** General concerns about the preconstruction noise assessments.

- ⇒ Addressed by the Team, giving details of the Pre-Construction Noise Assessments performed and the following independent review of it to comply with all the requirements listed on the Planning Permit.

---

**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** Enquiry about the commencement date for the Community Fund.

- ⇒ Addressed by the Team, the Community Fund is effective from Operation of the Woolsthorpe Wind Farm.

Follow up on general interest about how the Community Fund will operate. Different questions regarding the structure and how the funds will be allocated.

- ⇒ Addressed by the team, also noting that special material was made for the Community Meeting and people can look at the after the meeting and ask questions to any Team member about more details. Also noting that the structure is not final and open for community input.

---

**Agenda item:** Questions from Community Members

**Presenter:**

**Discussion:** Concerns and general diaponintment that there were no Moyne Shire Council representative at the meeting. Also mentioning that some of the questions brought up at the Community Meeting could have been addressed by them

- ⇒ The Team mentioned that some Moyne Shire Council representatives had given their apologies from the meeting.

---

**Agenda item:** Closing

**Presenter:** Scott De Keizer

**Discussion:** Finish meeting, opening now the opportunity to talk one on one with some community members regarding their concerns and questions about the project.

The Project's Team will also move after to The National, where further conversation on the project's subjects can be addressed.

---
